

Program Overview:

The Nuance Mobile Developer Program (NMDP) gives developers of mobile applications access to cutting edge Nuance speech technology. The program is open to developers from one individual to Fortune 500 corporations. Through NMDP, for the first time developers around the world gain access to the Dragon Mobile SDK - the same speech technology platform used in Nuance's renowned Dragon NaturallySpeaking Desktop products and the popular Dragon Dictation and Dragon Search iOS applications.

In addition to speech recognition, the SDK also provides access to the Nuance Vocalizer Text-To-Speech engine, which generates natural sounding audio from simple text input.

By speech-enabling mobile applications, mobile developers enable end-users to bypass the challenges of complex menus, cumbersome keypads, and seemingly endless clicks – while also delivering users enhanced smartphone usability and higher productivity- all powered simply by voice.

Easy-to-use, the Dragon Mobile SDK's distributed architecture eliminates the need for a large client footprint that requires regular updates. Developers simply integrate their application with a small-footprint client SDK that provides network access to Nuance's broad portfolio of industry-leading speech recognition and text-to-speech (TTS) technology.

Who is it For?

Application Developers, Enterprise Customers, Anyone interested in leveraging Nuance's speech technology to power mobile applications

Program Features:

- Self-service model with access to on-line support forum, a variety of code samples and full documentation
- 90 days of free access to the cloud-based speech services to validate the power of speech recognition on the app
- Leverages Dragon NaturallySpeaking engine for free-form dictation recognition
- Leverages Nuance's Vocalizer engine for highly intelligible TTS

NMDP Benefits:

- Minimal integration effort – small footprint SDK with simple API
- Highly accurate and fast speech recognition results
- Rapidly deploy speech recognition and TTS-enabled apps – speak to your app within minutes!
- Enhance mobile application functionality
- Improve end-user experience through increased productivity and faster and easier access to information and content
- Significant branding opportunity as a Nuance partner
- Increase sales and drive revenue for your app

Distribution Model:

- Developer access is FREE
- Several options available for production subscription
- Direct traffic and sales to application developers

Product Offerings:

- Dragon Dictation is an easy-to-use voice recognition app powered by Dragon Naturally Speaking that allows you to speak and instantly see your text or email messages.
- With Dragon Search, you can simply speak your search queries and receive simultaneous results from a variety of top websites and content sources.
- Vocalizer Text-to-Speech (TTS) generates natural sounding audio from simple text input.

Languages:

- Dragon Dictation and Dragon Search are available in:
 - US English
 - UK English
 - German
 - French
 - Spanish
 - Italian
 - Japanese
 - More on roadmap
- Vocalizer TTS available in 35+ languages (posted on NMDP website)

Platforms

- iOS 4.0
- Android OS v2.1 and v2.2*
- Other Platforms in Research & Development
